FENCE SYSTEMS

THE ART OF BLENDING IN!

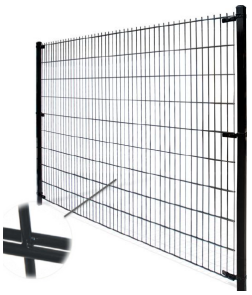

To Whom it May Concern,

Omega II Fence Systems has been offering custom solutions for customer since 1992. One of the solutions is offering curved panels.

Below are the panel types that we can curve as well as the table showing their capacities:

Omega Secur

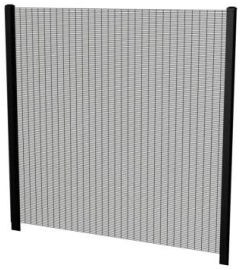

Omega Elite

Omega Evolution

Omega MAX - Double Wire

DIRECTION OF THE CURVE	Omega Architectural	Omega MAX double wires	Elite/Evolution	Secur
LENGTH (bending horizontal wires)	Impossible to curve panels because of the V- bend	Minimum radius: 5' (1.5m)	Minimum radius: 5' (1.5m)	Minimum radius : 25' (7.6m)
HEIGHT (bending vertical wires)	Impossible to curve panels because of the V- bend	Minimum radius: 1'3" (0.4m)	Minimum radius: 5' (1.5m)	Minimum radius: 5' (1.5m)

Keep in mind at 25'or lower, the wires start to deform a bit as shown in the photo below:

This is a normal part of the curving process and we want to make sure you are aware of this result. Feel free to reach out to us with questions and we would be happy to assist.

Thank you,
Esti Karo
