

GABION BENCHES & FENCES

As an innovative concept for adding color and illumination, as well as additional seating, gabion benches & fences were built onsite. During the evening, light shines up from below, illuminating the light blue glass. The electrical elements are concealed within custom blocks on the sides.

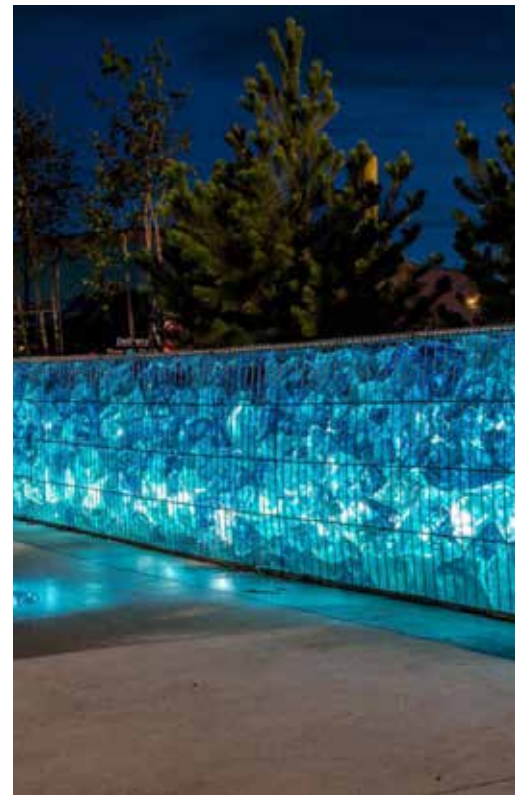

Omega II Fence Systems provided the Evolution double wire panels, custom cut to size with customized attachments. Easy to install, the sturdy, see-through panels of the Evolution were the ideal, cost-effective solution for this project. Gabion benches and fences are just some of the custom capabilities and benefits of having in-house engineers. Omega II offers standard sizes for the gabions using the Evolution or Elite panels as well as a 2"x 2" mesh option.

Contact us today to see how we can support your project's needs, or your feet with these gabion benches!
