

WOOD'S DURABILITY & METAL'S LONGEVITY

When looking at a softer fence appearance with the strongest of designs, look no further than the partnership Omega II Fence Systems has had with nature. From incorporating wood posts to using our panels as infills, from alternating slats to using wooden gates, we have done it all. You can say our wood & metal fence options are growing.

Although we do not provide wood as an option, our in-house Engineering can assist in bringing your design to life. Let us know how we can transport you back to nature!
